## Fund objective

This fund is designed to provide long term steady growth together with a low level of investment risk. The fund invests, either directly or indirectly, in a diversified portfolio of fixed interest securities, equities, property, cash and other related instruments. The fund aims to avoid sharp rises and falls by gradually averaging the price applied to the investment over the first 26 weeks followed by 'averaging' the investment price over a rolling 26 week period from week 27 onwards.

\*The fund launch date relates to this particular share class only. For some versions of the Smoothed Managed Funds, performance has been extended back prior to the launch date by using performance from previous share classes of the same funds. Performance for the LV= fund has been calculated using the underlying unit price for the first 26 weeks, then the averaged price thereafter; with the exception of some funds launched since 2022 where the performance shown is only calculated using the averaged unit price.

During the first 26 weeks of a customer's investment, their product will be valued using a gradual averaged or underlying unit price. Please see the 'Your guide to how we manage our unitised with-profits Smoothed Managed Funds business' document for further information.

The LV= fund performance figures are gross and do not take account of the Annual Management Charge or any product charges, as these are taken by the cancellation of units.

**Please remember that past performance is not a reliable guide to the future. The value of an investment can go down as well as up.**
